ASHLEIGH ROBINSON

GRAPHIC DESIGNER

About

My name is Ashleigh Robinson, and I am an artist and choreographer in North Idaho. My emphasis is in graphic design, specifically web design. There is a workflow in creating interesting and useful screen design that stands out to me. I enjoy making user-centric web designs based on the brand attitude. Design has a problem solving approach that is familiar to me from coaching. UX design is similar as well, with a vast array of networking and understanding a person required to create an intuitive design.
